

# Measuring carbon footprint through Life Cycle Assessments (LCAs)

Sustainability starts with transparency. That's why we carry out LCAs on our products, to understand their impact on the environment. So you can see the carbon footprint of your product at a glance, and we can work to make future products more sustainable. Everybody wins.

## EVOLVE2 30

①	Plastics	0.54kg CO <sub>2</sub> -eq	12.08%
②	Metals	0.08kg CO <sub>2</sub> -eq	1.78%
③	Electronic components	0.21kg CO <sub>2</sub> -eq	4.74%
④	Printed circuit board	0.28kg CO <sub>2</sub> -eq	6.15%
⑤	Manufacturing	1.41kg CO <sub>2</sub> -eq	31.40%
⑥	Packaging	0.04kg CO <sub>2</sub> -eq	0.91%
⑦	Transport	1.58kg CO <sub>2</sub> -eq	35.20%
⑧	Usage	0.32kg CO <sub>2</sub> -eq	7.15%
⑨	End of life	0.03kg CO <sub>2</sub> -eq	0.59%

Product carbon footprint

# 4.48

Bureau Veritas verified kg CO<sub>2</sub>eq

- Resources
- Processing
- Manufacturing
- Distribution
- Use
- End of life

Main life cycle stages (% of total kg CO<sub>2</sub>e)

All estimates of carbon footprint are uncertain. Jabra has followed the LCA reporting rules from ISO 14067:2018. The report has been verified according to ISO 14067-3 Specification with guidance for the verification and validation of GHG statements, ISO 14065 Requirements for Validation and Verification, & ISO 14066 Competence requirements for GHG validation teams and verification teams. The scope of the LCA is 2 years of use in London (UK) reflecting the average warranty period and average use case.
