BENEFITS

Advanced Bluetooth Multipoint keeps you connected to both your laptop and smartphone at the same time, making it easier to switch between devices and work wherever you want to.

Four microphones, clever algorithms, and bone conduction sensors work in tandem to cut through background noise, so you’ll hear and be heard clearly wherever you’re taking calls.

Evolve2 Buds come with a powerful USB adapter for your laptop to boost and stabilize your connection, for fewer dropouts and a wireless range of up to 20m/65ft.

Compact, comfortable, ultra-durable and water resistant, our tiny earbuds have an ergonomic fit based on 60,000+ ear scans, to feel custom-made just for you.

Go all day, with up to 8 hours of battery in the buds, and up to 33 hours in the compact Qi-certified wireless charging case, with a quick-boost 1-hour charge in 5 minutes.

A snug fit and adjustable Active Noise Cancellation help you create your very own quiet zone. Choose the level of noise cancellation you need to block out unwanted noise and use MyFit in the Jabra Sound+ app to find your best sound-sealing fit.

Need to hear something but don’t want to take your buds out? Tap the HearThrough button to hear everything – from your coffee order to a colleague’s quick question - with perfect clarity.

Evolve2 Buds keep your hearing safe no matter how many calls you’re on, with Jabra SafeTone™ and SafeTone™ monitoring average audio levels, and PeakStop™ to prevent sudden loud audio spikes.

Evolve2 Buds are certified to make your online meeting experience the best it can be, with a professional USB adapter to make the quality of your connection even better. Choose between a Microsoft Teams-optimized variant and one that works with Zoom, Google Meet, and other major meeting platforms.
