Jabra Elite Active 75t - Titanium Black

How do I control Active Noise Cancellation and HearThrough?

Prerequisites

- Jabra Sound+ - Android
- Jabra Sound+ - iOS

On your Jabra earbuds, HearThrough is enabled by default. To use Active Noise Cancellation (ANC), you must set it up using Jabra Sound+.

To set up and personalize ANC for your earbuds, go to Jabra Sound+, under **Sound Modes**, tap **Active Noise Cancellation** and follow the on-screen instructions.

Note

On the Sound+ home page, you can always adjust both HearThrough and ANC to your preference.

HearThrough will turn off during a call and then resume when the call is finished.

When not on a call, you can cycle between ANC/HearThrough/Off by pressing the **Left** button.

In Sound+ > Settings icon > Headset settings > Headset configuration, you can change the modes you want to cycle between when you press the **Left** button on your earbuds:

- HearThrough & ANC
- HearThrough & Off
- HearThrough, ANC & Off

Download Jabra Sound+ from Google Play to your Android device or from the App Store to your iOS device.
