Jabra BT2035

When I use my Jabra Bluetooth solution with the OnePlus 5/5T smartphone, why is there no audio for calls and music in the Jabra solution?

This is currently (December 2018) a known issue with the OnePlus 5/5T smartphone, regardless of the connected Bluetooth solution. See more details on the OnePlus Support Forum here.

The following troubleshooting steps have helped some users and may work for you. Try to power the smartphone off/on. Try to turn AirPlane mode on/off.
